

## [2.9. Is a mind-body unity aligned with Satan possible?](#)

In lectures about the Divine Principle, I once heard the concept that the mind-body unity must be centered on God, as it is also possible to have a mind-body unity centered on Satan.

This can only be understood that way if one reduces the mind-body unity to pure willpower. Soldiers of an evil regime like the Nazis or organized criminals also have a strong willpower.

Sun Myung Moon explains it as follows:

**God, mind, and body form an isosceles triangle. The closer the mind and body come, the closer one is to God.**

**So there is no mind-body unity that does not bring us closer to God. Otherwise, it is not a true mind-body unity, but a unity between the fallen mind and the body.**

Mind-body unity is a spiritually higher state and consciousness. The spirit-mind assumes the guiding function in relation to the physical mind, the brain, and the body.

**As we read in the Divine Principle, the spirit-mind is inseparable from God and only exists in connection with God.**

Here we see again how important it is to understand that our mind is not the spirit and that our conventional human mind or psyche and the spirit-mind represent different levels.
